I chose this site because; I am currently developing it for my sister and the Bayou chapter of the Autism Society. The design is set up to become a blog later in the year. It is a very simple layout.

My HTML5 video tag is on the home page. It is a video I helped produce while I was working for KWBj TV-22.

My jQuery fadeTo effect is on the home page. It is used to fade pictures to a 0 opacity to reveal text behind it. I included a button to reset the images using fadeTo opacity of 1.

My gallery is on the gallery page and I use the fancybox plugin. All the images are used with consent from My sister Dawn Spinella, President of the Bayou Chapter of the Autism Society.

My 2 HTML5 Canvas tags are on the contact page. I used them to draw out simple images. One is a telephone and one an envelope.

Unfortunately, I was unable to find a way to incorporate a map or info graphic on the site.

So I was only able to do 3 out of the 4.
