I chose to cover Fancybox for this assignment. It is a neat little alternative to Lightbox. I found that it has better functionality than Lightbox and just looks better overall. The fact that it allows you to loop through the images and not stop at the end is well worth it to me.

I chose to use this because I am in the process of creating a photo gallery for my sisters website http://bayouautism.org and the Louisiana State Autism website at http://lastateautism.org. Both of them require a nice photo gallery and after doing a lot of research I think that Fancybox is the way I am going to proceed.

Here is the link to my video http://youtu.be/yqAoWQvoLZ4
